# How to Use this Index

Every article appearing in Business Week during the first six months of 1966 is comprehensively indexed in this volume. All articles are indexed alphabetically by subjects and by the names of individuals, private businesses and government agencies in all cases where such were either the subject of the story reported or had a primary relationship to the topic covered. The following paragraphs are offered as a guide to the index.

**Business Organizations.** Industries are indexed under their simple designations such as: "Aviation," "Shipbuilding," "Textiles," etc. In addition, all articles having reference to a private company will be found under that company's name.

**Labor.** General labor news is indexed under such broad headings as "Wages," "Employment," "Labor," and the like. Reference should also be made to the various government labor agencies and to individual companies. Because the full names of many trade unions are not generally well known, trade union items are indexed by parent organization, under "AFL-CIO," or "Independent Unions," and then in turn under subheads by the trade or industry in which they operate. There is one exception: the railroad brotherhoods are indexed only under "Railroads—Labor."

**Government.** The permanently established departments of the Federal Government will be found under "D," "Department of the Treasury," "Department of Defense," and "Post Office Department."

**Independent Commissions and Special Emergency Agencies.** These will be found arranged alphabetically by their established names. In addition, they are also indexed under their field of activity.

**Reference Dept.** Many individual headings suggest other entries (See also . . .) which may be consulted in looking for specific articles. If, however, you cannot find a specific article, or you would like any general information about material which Business Week has published, do not hesitate to make direct inquiry by mail or telephone to Business Week Library, 330 West 42nd Street, New York 10036, N. Y.; telephone 971-3298.

OF EDITORIAL CONTENT – 2nd HALF 1966

# How to Use this Index

Every article appearing in Business Week during the last six months of 1966 is comprehensively indexed in this volume. All articles are indexed alphabetically by subjects and by the names of individuals, private businesses and government agencies in all cases where such were either the subject of the story reported or had a primary relationship to the topic covered. The following paragraphs are offered as a guide to the index.

**Business Organizations.** Industries are indexed under their simple designations such as: "Aviation," "Shipbuilding," "Textiles," etc. In addition, all articles having reference to a private company will be found under that company's name.

**Labor.** General labor news is indexed under such broad headings as "Wages," "Employment," "Labor," and the like. Reference should also be made to the various government labor agencies and to individual companies. Because the full names of many trade unions are not generally well known, trade union items are indexed by parent organization, under "AFL-CIO," or "Independent Unions," and then in turn under subheads by the trade or industry in which they operate. There is one exception: the railroad brotherhoods are indexed only under "Railroads—Labor."

**Government.** The permanently established departments of the Federal Government will be found under "D," "Department of the Treasury," "Department of Defense," and "Post Office Department."

**Independent Commissions and Special Emergency Agencies.** These will be found arranged alphabetically by their established names. In addition, they are also indexed under their field of activity.

**Reference Dept.** Many individual headings suggest other entries (See also . . .) which may be consulted in looking for specific articles. If, however, you cannot find a specific article, or you would like any general information about material which Business Week has published, do not hesitate to make direct inquiry by mail or telephone to Business Week Library, 330 West 42nd Street, New York 10036, N. Y.; telephone 971-3298.
